

BNP Paribas US Governance Multi Asset Index

Bloomberg Ticker: BNPIUGMA Index

FOR INFORMATIONAL PURPOSES ONLY – NOT INTENDED FOR FURTHER DISTRIBUTION. FOR INSTITUTIONAL INVESTORS ONLY, NOT FOR USE WITH RETAIL INVESTORS

WHY IS GOVERNANCE RELEVANT FOR INVESTORS?

Corporate Governance, the “G” in ESG, is the collection of rules, practices and processes that define **how a company is directed and controlled**. Academic evidence¹ suggests that **corporate governance may enhance company performance**:

- Companies with strong governance tend to have **above average risk control** and compliance standards, leading to less frequent fraud and corruption²
- Additionally, good governance may bring companies a **competitive advantage** due to more efficient use of resources, as well as better development of long-term business plans and incentives for senior management²

THE BNP PARIBAS US GOVERNANCE MULTI ASSET INDEX

The BNP Paribas US Governance Multi Asset Index (“the Index”) is a rules-based Index, comprised of seven components – one equity index, three treasury futures indices and three commodity indices (the “Selected Portfolio”), aiming to source ethical outperformance while benefiting from a diversified exposure through additional varied and international assets.

- The Index offers the opportunity to **target ESG investment goals** through the potential alpha that **good governance** practices aim to create for companies
- With an aim to pick the US companies with **improved corporate governance**, BNP Paribas uses data provided by ISS ESG³, the responsible investment arm of leading provider of corporate governance and responsible investment solutions, Institutional Shareholder Services (ISS). ISS ESG’s Governance QualityScore monitor is designed to help track and quantify relative best practices of governance.

INDEX METHODOLOGY OVERVIEW:

50 US stocks⁴ with both **good Governance scores** and **Growth prospects** form the equity portion of the Index.

International treasuries⁵ and **commodities⁶** are included in the Index to try to maintain a diversified range of exposures. On a daily basis, the Index **dynamically rebalances** the weights of its components according to a proprietary rules-based methodology.

In addition to its multi asset components, the Index leverages a **commodity carry overlay⁷** to attempt to capture additional outperformance.

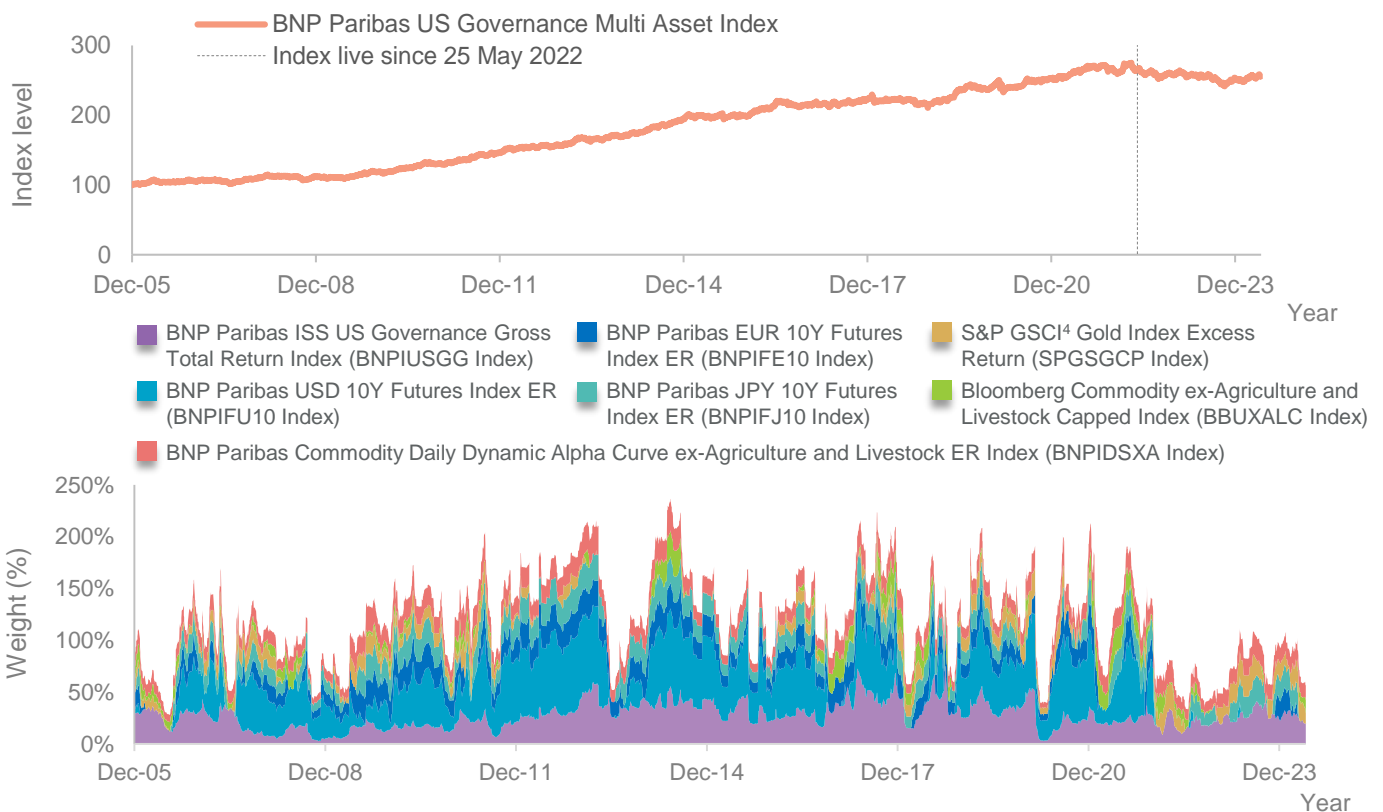

In order to maintain the Index's annualized volatility of 5%, the Index employs a **risk control mechanism** that aims to adjust allocations among its components and a hypothetical cash position.

¹ Academic evidence includes, among others, the studies of Corporate Governance and Performance in Socially Responsible Corporations: New Empirical Insights from Neo-Institutional Framework by C. Ntim and T. Soobaroyen, Corporate Governance, An Institutional Review 21 (August 2013); Corporate governance and firm operating performance by Lawrence D. Brown and Marcus L. Caylor, Review of Quantitative Finance and Accounting, 129–144 (2009); and Corporate governance and firm performance by Sanjai Bhagat and Brian Bolton, Journal of Corporate Finance (April 2008). ² Foundations of ESG Investing: How ESG Affects Equity Valuation, Risk, and Performance by G. Giese, L. Lee, D. Melas, Z. Nagy, and L. Nishikawa, The Journal of Portfolio Management, volume 45, number 5 (July 2019). ³ ISS refers to Institutional Shareholder Services Inc. ⁴ BNP Paribas ISS US Governance Gross Total Return Index (BNPIUSGG Index). ⁵ BNP Paribas USD 10Y Futures Index ER (BNPIFU10 Index), BNP Paribas EUR 10Y Futures Index ER (BNPIFE10 Index) and BNP Paribas JPY 10Y Futures Index ER (BNPIFJ10 Index). ⁶ S&P GSCI4 Gold Index Excess Return (SPSGGCP Index) and Bloomberg Commodity ex-Agriculture and Livestock Capped Index (BBUXALC Index). ⁷ BNP Paribas Commodity Daily Dynamic Alpha Curve ex-Agriculture and Livestock ER Index (BNPIDSXA Index). The information displayed in the articles has not been independently verified by BNP Paribas.

INDEX INFORMATION

Bloomberg ticker	BNPIUGMA Index	Index Type	Excess return ¹

ANNUALIZED RETURN / ANNUALIZED VOLATILITY	0.24	0.06	-	0.47	0.72	1.06

Source: Bloomberg, BNP Paribas from 30 December 2005 to 31 May 2024. Past performance is not an indicator of future performance.

¹The BNP Paribas US Governance Multi Asset Index is an "Excess Return Index" meaning its returns are derived from changes in level of its components (known as "price return") and profit or loss gained from rolling from one futures contract to another (known as "roll return"). Unlike Total Return Indices, it does not derive returns based on interest earned on cash or other collateral deposited in connection with the purchase of futures contracts (known as "collateral return").

²The BNP Paribas US Governance Multi Asset Index is based on hypothetical Past Performance Data ("PPD") prior to the live date 25 May 2022, actual/historical performance begins after Launch Date. Because the BNP Paribas US Governance Multi Asset Index did not exist prior to the launch date, all retrospective levels provided in the graphs and tables above are simulated and must be considered illustrative only. The presentation of hypothetical data reflects the deduction of fees and charges. These simulations are the result of estimates made by BNP Paribas at a given moment on the basis of the parameters selected by BNP Paribas, certain assumptions that may or may not hold in future periods, of market conditions at this given moment and of historical data, which should not be used as guidance, in any way, of the future results of the BNP Paribas US Governance Multi Asset Index.

³Commodity Carry overlay is added in the form of a BNP Paribas Index that captures outperformance of maturity positioning commodity futures versus the front month of 10 mono-commodities (WTI, Brent, Heating Oil, Gasoline, Natural Gas, Gasoil, Aluminum, Zinc, Nickel, Copper).

⁴GSCI refers to Goldman Sachs Commodity Index

SELECTED RISKS & CONSIDERATIONS ASSOCIATED WITH THE INDEX

The BNP Paribas US Governance Multi Asset Index levels are based on the values of notional assets and liabilities.

The BNP Paribas US Governance Multi Asset Index only calculates the exposure to a dynamic, hypothetical portfolio that tracks the excess returns of the underlying components and is purely notional. There is no actual portfolio of assets to which any person makes any investment or has any ownership interest.

No recommendation.

BNP Paribas makes no recommendation as to the suitability for investment of the BNP Paribas US Governance Multi Asset Index or any products or strategies based partly or wholly on BNP Paribas US Governance Multi Asset Index. You should reach a decision after careful consideration with your advisors.

Strategies relying on the levels of the BNP Paribas US Governance Multi Asset Index may not be successful.

There is a risk that the rules-based methodology of the BNP Paribas US Governance Multi Asset Index does not meet its stated objectives, including meeting its annualized target volatility of 5%, resulting in underperformance of the components that comprise the index.

Correlation of performances among the underlying components may reduce the levels of the BNP Paribas US Governance Multi Asset Index.

Performances among the underlying components may become highly correlated from time to time. High correlation during periods of negative returns among underlying components representing any one sector or asset type that have a substantial weighting in the BNP Paribas US Governance Multi Asset Index could have a material adverse effect on the levels of the BNP Paribas US Governance Multi Asset Index, which could in turn negatively affect the performance any product or strategy based partly or wholly on the levels of the BNP Paribas US Governance Multi Asset Index.

Legal and regulatory regimes may affect the BNP Paribas US Governance Multi Asset Index, its components or its sub-components.

The BNP Paribas US Governance Multi Asset Index and its components (and sub-components thereof) are subject to legal and regulatory regimes in various regions and, in some cases, in other countries that may change in ways that could negatively affect the BNP Paribas US Governance Multi Asset Index or its components (or sub-components thereof). Changes to the applicable legal or regulatory regimes may have a negative impact on the BNP Paribas US Governance Multi Asset Index level. The components (or sub-components thereof) of the index that are traded on one or more public exchanges are subject to the rules of the relevant exchange.

The BNP Paribas US Governance Multi Asset Index has limited historical information.

The BNP Paribas US Governance Multi Asset Index is a new strategy, launched on 25 May 2022. The performance shown before that date is hypothetical past performance, based on hypothetical back-tested information. This brochure also contains certain performance data based on back-testing, i.e., calculations of the hypothetical levels of the BNP Paribas US Governance Multi Asset Index as if it had actually existed during a defined period of time, and may in certain circumstances contain simulated levels information where the BNP Paribas US Governance Multi Asset Index has recently been established or issued. For time periods prior to the launch of any ETF included in the index, back-testing uses alternative performance information derived from a proxy with similar asset exposure, rather than performance information for the relevant ETF. Further, you must note that such analysis is based on a number of working assumptions that may not be capable of duplication in actual trading terms. Unlike actual performance records, hypothetical or simulated performances, returns or scenarios may not necessarily reflect certain market factors such as liquidity constraints, fees and transaction costs and must be considered as illustrative only. Actual historical or back-tested past performance does not constitute an indication of future results. The actual performance of the BNP Paribas US Governance Multi Asset Index may bear little relation to its hypothetical historical results.

The BNP Paribas US Governance Multi Asset Index has limited public information.

The BNP Paribas US Governance Multi Asset Index is a custom index developed by BNP Paribas, the Index Sponsor. There is limited information relating to the BNP Paribas US Governance Multi Asset Index that is publicly available. In addition, publicly available information on the BNP Paribas US Governance Multi Asset Index, its methodology and its components is limited.

The BNP Paribas US Governance Multi Asset Index's daily volatility control mechanism may result in a lower index level and the actual volatility of the BNP Paribas US Governance Multi Asset Index may not equal its target volatility.

The BNP Paribas US Governance Multi Asset Index's daily volatility control allows the BNP Paribas US Governance Multi Asset Index to dynamically adjust the value of the hypothetical exposure to the portfolio the index is based on and any cash component, depending on the volatility environment. However, the risk control overlay might limit overall levels of the BNP Paribas US Governance Multi Asset Index in rising equity markets and may provide imperfect, limited protection in falling equity markets, particularly against sudden, large equity losses. No assurance can be given that the BNP Paribas US Governance Multi Asset Index methodology will achieve its target volatility goals or that products or strategies based partly or wholly on the levels of the BNP Paribas US Governance Multi Asset Index will outperform any alternative investment.

The closing levels of the BNP Paribas US Governance Multi Asset Index will include the deduction of an Annual Fee.

BNP Paribas US Governance Multi Asset Index is an excess Index. Therefore, performance is net of rebalancing and replication fees.

In addition to that, the closing level of the BNP Paribas US Governance Multi Asset Index includes a deduction from the aggregate values of its components of an annual fee equal to 0.50% per annum. As a result of this deduction, the value of the BNP Paribas US Governance Multi Asset Index will trail the value of a hypothetical identical portfolio from which no such amount is deducted.

The closing level of the BNP Paribas US Governance Multi Asset Index is net of BNP Paribas' replication and rebalancing costs.

The Closing Level of the BNP Paribas US Governance Multi Asset Index is net of BNP Paribas' replication and rebalancing costs associated with the index. As a result of these costs, the value of the BNP Paribas US Governance Multi Asset Index could trail the value of a hypothetical identical portfolio from which no such amount is deducted.

The BNP Paribas US Governance Multi Asset Index is an excess return index.

In general, returns from investing in futures contracts are derived from three sources: (1) changes in the price of such futures contracts (known as the "price return"), (2) profit or loss realized when rolling from a futures contract with one expiry date to another futures contract with a different, generally later, expiry date (known as the "roll return") and (3) interest earned on the cash (or other) collateral deposited in connection with the purchase of such futures contract (known as the "collateral return"). The components of the BNP Paribas US Governance Multi Asset Index that seek to track futures contracts generate "excess returns", meaning the sum of the price return and roll return with respect to the underlying components. As a result, with respect to the BNP Paribas US Governance Multi Asset Index's underlying components that seek to track futures contracts, an investment in an instrument linked to the BNP Paribas US Governance Multi Asset Index will not generate the same returns that would be obtained from investing directly in future contracts that underlie such underlying components because the collateral return is not used in calculating the "excess return" index. With respect to each ETF included in the index, the index measures their performance plus dividends paid on such ETFs, less the interest rate. Increases in the level of the interest rate may offset in whole or in part increases in the levels of the index components that are ETFs.

BNP Paribas Arbitrage SNC, an affiliate of the BNP Paribas US Governance Multi Asset Index Sponsor, BNP Paribas, is the index's calculation agent who is responsible for calculating the levels of the BNP Paribas US Governance Multi Asset Index.

The policies and calculations for which the calculation agent is responsible could have an impact, positive or negative, on the level of the BNP Paribas US Governance Multi Asset Index. BNP Paribas and its Affiliates are under no obligation to consider your interest as an investor in a product linked to the BNP Paribas US Governance Multi Asset Index.

Portions of the BNP Paribas US Governance Multi Asset Index may be effectively uninvested and earn no return.

The BNP Paribas US Governance Multi Asset Index, on each day on which it is calculated, adjusts its exposure to its components in an attempt to maintain an annualized volatility of 5%. If the aggregate weight of the components is less than 100%, the BNP Paribas US Governance Multi Asset Index will allocate exposure to a hypothetical cash position. As a result, the BNP Paribas US Governance Multi Asset Index may underperform a similar index that provides 100% exposure to its components. The hypothetical cash position is an uninvested position that does not earn interest or any other return.

The price, level or value of the components used in the BNP Paribas US Governance Multi Asset Index may differ from other publicly available prices.

The levels of the components that are Treasury Futures Indices (the "BNPP Component Indices") are intended to reflect the performance of the relevant futures contracts on a daily volume-weighted average price, subject to a set of trade filters selected by the Index Sponsor to exclude trades with certain codes provided by the relevant exchange that indicate non-standard trades. Such levels are calculated by the Index Calculation Agent or an affiliate thereof and are not publicly available and may not reflect all trades reported by the relevant futures exchange. The daily closing price or any other price of the underlying futures contract may vary from the volume-weighted average price reflected by the level of the applicable BNPP Component Index.

Furthermore, a BNPP Component Index may be subject to a disruption due to the unavailability of a volume-weighted average price despite regular trading of the underlying futures contract and the availability of a closing price for such contract.

The BNP Paribas US Governance Multi Asset Index's target volatility feature may reduce its appreciation potential.

Under normal circumstances, equity or commodity futures may exhibit significantly higher volatility than the target volatility of 5%. Accordingly, the "volatility control" mechanism of the BNP Paribas US Governance Multi Asset Index may have the effect of skewing allocations among components in the BNP Paribas US Governance Multi Asset Index toward components that provide exposure to fixed-income assets (which typically have lower volatility than components that provide exposure to equity or commodity futures) or to cash (which has zero volatility). Index components that typically have lower volatility may have lower return potential than components that typically have higher volatility, and any allocation to cash will earn no return at all.

Moreover, if the BNP Paribas US Governance Multi Asset Index has a relatively high allocation to components that provide exposure to fixed-income assets, it will be particularly sensitive to factors that adversely affect the value of fixed-income instruments, such as increases in interest rates or declining perceptions of credit quality. A high allocation to components that provide exposure to fixed-income assets may also cause the BNP Paribas US Governance Multi Asset Index to underperform a portfolio more heavily weighted with higher volatility assets under certain circumstances. For example, in an equity bull market that is accompanied by rising interest rates, a portfolio heavily weighted with components that provide exposure to fixed-income assets might decline in value as a result of the rising interest rates, while a portfolio heavily weighted with components that provide exposure to equities would appreciate in value.

Other Key Risks:

- The BNP Paribas US Governance Multi Asset Index involves daily rebalancing that is applied to the components. Changes in the value of the components may offset each other.
- The BNP Paribas US Governance Multi Asset Index is subject to risks associated with non-U.S. markets.
- Certain components are based on futures contracts and may be subject to currency exchange risk. The BNP Paribas US Governance Multi Asset Index contains a currency conversion mechanism that seeks to reduce losses due to currency exchange risk. It can also reduce or eliminate gains from currency exchange risk.
- BNP Paribas is the sponsor of the Treasury Futures Indices and of the Commodity Carry Index that underlie the BNP Paribas US Governance Multi Asset Index.

IMPORTANT INFORMATION

Legal Notice: This document is **CONFIDENTIAL AND FOR DISCUSSION PURPOSES ONLY**; it constitutes a marketing communication and has been prepared by a Sales and Marketing function within BNP Paribas and/or its subsidiaries or Affiliates (collectively "we" or "BNP Paribas"). As a confidential document it is submitted to selected recipients only and it may not be made available (in whole or in part) to any other person without BNP Paribas' written consent.

Certain strategies and/or potential transactions discussed in this document may involve the use of derivatives which may be complex in nature and may give rise to substantial risks, including the risk of total or partial loss of any investment or losses without limitation and which should only be undertaken by those with the requisite knowledge and experience. BNP Paribas makes no representation and gives no warranty as to the results to be obtained from any investment, strategy or transaction, or as to whether any strategy, security or transaction described herein may be suitable for recipients' financial needs, circumstances or requirements. Recipients must make their own assessment of strategies, securities and/or potential transactions detailed herein, using such professional advisors as they deem appropriate. BNP Paribas accepts no liability for any direct or consequential losses arising from any action taken in connection with or reliance on the information contained in this document even where advised of the possibility of such losses.

As an investment bank with a wide range of activities, BNP Paribas may face conflicts of interest and you should be aware that BNP Paribas and/or any of its Affiliates may be long or short, for their own account or as agent, in investments, transactions or strategies referred to in this document or related products before the material is published to clients and that it may engage in transactions in a manner inconsistent with the views expressed in this document, either for their own account or for the account of their clients. Additionally, BNP Paribas may have acted as an investment banker or may have provided significant advice or investment services to companies or in relation to investments mentioned in this document. The information in this document is not intended for distribution to, or use by, any person or entity in any jurisdiction where (a) the distribution or use of such information would be contrary to law or regulations, or (b) BNP Paribas or a BNP Paribas affiliate would become subject to new or additional legal or regulatory requirements. Persons in possession of this document should inform themselves about possible legal restrictions and observe them accordingly.

The BNP Paribas US Governance Multi-Asset Index described in this document is the exclusive property of BNP Paribas (the "Index Sponsor"). BNP Paribas Arbitrage SNC (the "Index Calculation Agent") and the Index Sponsor do not guarantee the accuracy and/or completeness of the composition, calculation, publication and adjustment of the Index, any data included therein, or any data from which it is based, and the Index Calculation Agent and the Index Sponsor shall have no liability for any errors, omissions, or interruptions therein. The Index Calculation Agent and the Index Sponsor make no warranty, express or implied, as to results to be obtained from the use of the Index.

The Index Calculation Agent and the Index Sponsor make no express or implied warranties, and expressly disclaim all warranties of merchantability or fitness for a particular purpose or use with respect to the Index or any data included therein. Without limiting any of the foregoing, in no event shall the Index Calculation Agent and the Index Sponsor have any liability for any special, punitive, indirect, or consequential damages (including lost profits), even if notified of the possibility of such damages.

BNP PARIBAS HAS DEVELOPED, MAINTAINS AND IS THE SOLE PARTY RESPONSIBLE FOR THE METHODOLOGY THAT IS EMPLOYED IN CONNECTION WITH THE INDEX. PROSPECTIVE INVESTORS ARE ADVISED TO MAKE AN INVESTMENT IN ANY PRODUCT ONLY AFTER CAREFULLY CONSIDERING THE RISKS ASSOCIATED WITH INVESTING IN SUCH PRODUCT, AS DETAILED IN AN OFFERING MEMORANDUM OR SIMILAR DOCUMENT THAT IS PREPARED BY OR ON BEHALF OF THE ISSUER OF THE PRODUCT OR THE INDEX SPONSOR.

This document contains certain performance data based on back-testing (i.e., simulations of performance of a strategy, index or assets as if it had actually existed during a defined period of time). To the extent any such performance data is included, the scenarios, simulations, development expectations and forecasts contained in this document are for illustrative purposes only. All estimates and opinions included in this document constitute the judgment of BNP Paribas and its Affiliates as of the date of the document and may be subject to change without notice. This type of information has inherent limitations which recipients must consider carefully. While the information has been prepared in good faith in accordance with BNP Paribas' or its Affiliates' own internal models and other relevant sources, an analysis based on different models or assumptions may yield different results. Unlike actual performance records, simulated performance, returns or scenarios may not necessarily reflect certain market factors such as liquidity constraints, fees and transactions costs. Actual back-tested past performance does not constitute an indication of future results or performance.

The information in this document is not intended for distribution to, or use by, any person or entity in any jurisdiction where (a) the distribution or use of such information would be contrary to law or regulations, or (b) BNP Paribas or a BNP Paribas affiliate would become subject to new or additional legal or regulatory requirements.

This document is intended only for those defined under U.S. securities laws as "institutional investors" and/or "major institutional investors". Securities transactions with BNP Paribas that result from the provision of this document will be effected by or through BNP Paribas Securities Corp., a U.S. registered broker-dealer and member of FINRA, the New York Stock Exchange and other principal exchanges. Securities products offered by BNP Paribas Securities Corp. are not FDIC insured, are not bank deposits nor bank guaranteed, and are subject to investment risk, including possible loss of the principal invested.

BNP Paribas is incorporated in France with Limited Liability. Registered Office 16 boulevard des Italiens, 75009 Paris.
